

The Jayne Koskinas Ted Giovanis Foundation for Health and Policy (JKTG Foundation) funds cancer research, policy projects and events that foster public discussion to improve the quality and effectiveness of care patients experience.

In 2023, JKTG Foundation work focuses emerging cancer research and rethinking health care quality and effectiveness. Of particular interest is building collaboration by fostering multi-institutional and multi-disciplinary research in the area of breast cancer metastasis. The JKTG Foundation is honored to be supported by TeamTGM, a championship-winning race team that competes in the Michelin Pilot Challenge.

Below are initiatives JKTG Foundation is supporting.

Research & Policy Analysis |

- **Continuing to fund collaborative, emerging cancer research** that involves leading researchers with different areas of focus and backgrounds from organizations across the country.
- **Funding collaborative, mathematical research projects** that challenge traditional approaches to understanding cancer and cancer metastasis from hand-picked researchers across the country.
- **Investigating new policy proposals and changes to Medicare** and wider health care coverage with patients in mind, advocating against harmful rules, legislation and policy that impact the quality of care patients' experience.
- **Ongoing collaborative research** to identify the **underlying processes** of how breast cancer metastasizes for a better understanding and to facilitate more effective treatments.

Events |

- Hosting the annual Jayne Koskinas Memorial Symposium featuring leading cancer researchers and fostering **collaboration within health research disciplines**.
- **Convening clinician researchers, policy analysts, reporters, patients and others** to facilitate candid dialog on key issues serving as an independent broker of ideas.
